To run the executable, mac users may run into an error depending on their system's privacy settings. In order to properly run the executable, a user can navigate with the following steps:

1) This message will pop up for a mac user when they initially try to run the executable	2) User should navigate to System Settings → Privacy & Security → Scroll Down to Security → Click **'Open Anyway'**	3) Later when the user tries to rerun the executable they can click **'Open Anyway'** and it will now work
